

CHOOSE A MAJOR!!

Time to Research...

What majors interest you? List three majors, and research which post-secondary institutions have programs for that major.

Use “Go Places” <http://www.mnscu.edu/media/publications/pdf/goplaces07-08.pdf> or other post-secondary information found at <http://www.goplaces.org/media/publications/index.html>.

Volunteers: This step is very flexible and may take a lot of time. Take time to discuss with learners the possibilities they have. You may help the learner find information in the online guides or print sections of the guides for them. The following activities and resources may help learners find majors that interest them.

- Visit the MNCareers website to find possible careers.
<http://www.iseek.org/mncareers/>
- Look through the career resources at your local high school or library and read about the fastest-growing careers or the best jobs.
- Visit the college, university or training program’s website for more information on specific programs.
- Set up a job shadow to learn more about a specific career.
- Use the last page of the “Go Places” publication to send postcards to colleges to request more information.

Major 1: _____

Institutions that have this major:

Major 2: _____

Institutions that have this major:

Major 3: _____

Institutions that have this major:
