

Webinar: Roles & Goals for Adult Learners

Research indicates that adult learners who establish concrete goals and are given the opportunity to see that they are making measurable progress toward them are more likely to persist and succeed in their studies.

California Library Literacy Services uses an assessment system that focuses heavily on student goal setting. Join us and learn about a practice that motivates adult learners, keeps instructional sessions on track and provides qualitative information for funders and stakeholders.

In this **free** webinar, you will learn why this student-centered approach to learner goal setting is effective and be introduced to tools and techniques to help learners define and achieve their goals.
