

Health Careers 101: Educating Students about Opportunities in Health Care

The fastest growing employment sector in Florida is health care. Many job seekers are unaware of the wide range of high demand health careers that require minimal training (two years or less).

This session will cover strategies to help adult learners research and prepare for careers in health while they work toward a GED and build core skills in reading, writing, speaking and math!

Join us and learn more about FLC's new *Health Careers Guide* and other resources to help your students consider a rewarding career in health.

Date: December 7th

Time: 1:30 - 2:30pm

Space is limited, so register today!
