

## **Wells Fargo Financial Literacy Grant Recipients Announced**

The streamlined integration of literacy instruction and financial education promotes contextualized learning, an approach that helps people develop basic skills while acquiring information to make informed choices regarding their personal finances.

Most of the grant funded programs will be utilizing [Hands On Banking](#), a free curriculum made possible by Wells Fargo which includes instructor guides, interactive lessons and classroom activities. Special thanks to Wells Fargo for their generous \$55,000 pledge of support to make this initiative possible!
